

*Political Culture of Democracy in Guyana, 2010:
Democratic Consolidation in the Americas during Hard Times*

Technical information

<i>Country</i>	<i>Year</i>	<i>Sample Size</i>	<i>Weighted/Unweighted</i>
Guyana	2010	1,540	Unweighted

This survey was carried out between January and February of 2010, as part of the LAPOP AmericasBarometer 2010 wave of surveys. It is a follow-up of the national surveys of 2006, and 2009 carried out by the LAPOP. The 2010 survey was conducted by Vanderbilt University with the field work being carried out by Development Policy and Management Consultants (DPMC). The 2010 AmericasBarometer received generous support from many sources, including USAID, UNDP, IADB, Vanderbilt U., Princeton U., Université Laval, U. of Notre Dame, among others.

The project used a national probability sample design of voting-age adults, with a total N of 1,540 people. It involved face-to-face interviews conducted in English. The survey used a complex sample design, taking into account stratification and clustering.

The sample consists of seven strata representing the seven main geographical regions: the five coastal regions, region 10 and an area that includes regions 1, 7, 8 and 9. Each stratum was further sub-stratified by urban and rural areas. Respondents were selected in clusters of 6-8 interviews in urban areas and 10-12 in rural areas.

The sample consists of 54 primary sampling units and 261 final sampling units. A total of 456 respondents were surveyed in urban areas and 1,084 in rural areas. Respondents were selected in clusters of 6-8 in urban areas and 10-12 in rural areas. The estimated margin of error for the survey is ± 2.5 . Readers can access the questionnaire through a link on the LAPOP website: www.AmericasBarometer.org.
