On this image there is a staircase with steps numbered 1 to 7, where 1 is the lowest step and means NOT AT ALL and 7 the highest and means A LOT. For example, if I asked you to what extent do you like watching television, if you don't like watching it at all, you would choose a score of 1, and if, in contrast, you like watching television a lot, you would indicate the number 7. If your opinion is between not at all and a lot, you would choose an intermediate score. So, to what extent do you like watching television?

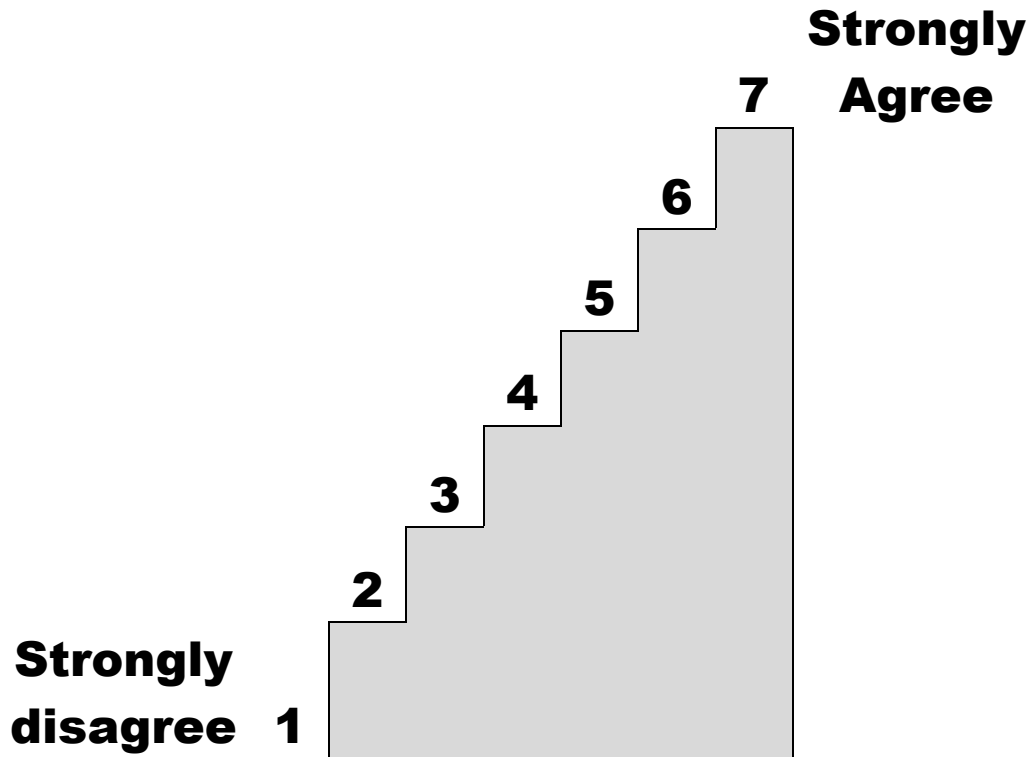

We are going to ask you a series of questions. We are going to ask that you use the numbers provided in the staircase to answer. Remember, you can use any number.	Coded 1-7
B1. To what extent do you think the courts in the United States guarantee a fair trial? If you think the courts do not ensure justice <u>at all</u> , choose number 1; if you think the courts ensure justice <u>a lot</u> , choose number 7, or choose a point in between the two.	Coded 1-7

LEGIS1A. Non-partisan groups often provide voter guides with short descriptions of legislative candidates. We would like your opinion about two candidates who we refer to as Candidate A and Candidate B. This particular election was closely watched because a leader from the majority party in the legislature has been mired in a scandal for illegally taking money from a special interest group for advancing their preferred legislation.

Candidate A is the incumbent from the majority party who has served in the legislature for 4 years. He supports caps on carbon emissions and supports fining businesses that hire illegal immigrants. During the previous session, he voted with his party 60 percent of the time.

Candidate B is the sitting mayor of a mid-size town in the district. During his time in office, his town has experienced slightly above average economic development and population growth. He opposes caps on carbon emissions and opposes fining businesses that hire illegal immigrants.

Based on these descriptions, which candidate would you vote for?

We would like your opinion about two candidates who we refer to as Candidate A and Candidate B. This particular election was closely watched because a leader from the majority party in the legislature has been mired in a scandal for illegally taking money from a special interest group for advancing their preferred legislation.

Candidate A is the incumbent from the majority party who has served in the legislature for 4 years. He supports caps on carbon emissions and supports fining businesses that hire illegal immigrants. During the previous session, he voted with his party 95 percent of the time.

Candidate B is the sitting mayor of a mid-size town in the district. During his time in office, his town has experienced slightly above average economic development and population growth. He opposes caps on carbon emissions and opposes fining businesses that hire illegal immigrants.

Based on these descriptions, which candidate would you vote for?
